

## Administration. Simple. Secure. Traceable.

Cash book, vehicle logbook, working time, leave and facility management – together in one application. BuVer supports companies and organisations in their daily administration and record keeping: modular, multi-tenant and, if you wish, running entirely on your own infrastructure. Each module can be enabled on its own – whoever needs only the vehicle logbook sees only the vehicle logbook.

### Cash book

Record income and expenditure, and keep them in order.

- entries and receipts, reversal only by counter-entry
- cost types, tax rates, consecutive receipt numbers
- monthly closing, reports and CSV export

### Vehicle logbook

Record journeys quickly and document them clearly.

- private and business journeys, vehicles and drivers
- position, odometer reading and route are suggested – OpenStreetMap or Verkehrsauskunft Österreich
- an unbroken sequence of journey numbers, reports for accounting

### Working time & leave

Manage working hours, leave and absences in one place.

- time clock or entered later; target, actual and balance
- approval by supervisors, including deputies
- leave account, blocked periods, absence calendar

### Facility management

Keep inspections, defects and deadlines in view.

- recurring inspections and walkthroughs with evidence
- defects with a deadline and a person responsible
- appointments, documentation and history

### Your data. Your infrastructure. Your control.

BuVer can run entirely within your own IT environment – no mandatory dependency on an external cloud. The map services for the vehicle logbook run at your site too, if you wish; then not even an address leaves your network.

## Security and traceability

- ✓ **Change log** – who, what, before and after.
- ✓ **Rights per role** – you decide who may do what.
- ✓ **Deputies** – the deputy may do the same, on the record.
- ✓ **Several organisations** – each sees only its own data.
- ✓ **Sign-in** – own account, Entra ID or passkey.
- ✓ **Daily backup** – database and receipts, stored outside the application.
- ✓ **Retention** – seven years, then deleted; users anonymised.
- ✓ **Accessibility** – checked automatically against WCAG 2.1 AA.

## For companies and organisations

### Companies

Staff, working hours, leave, vehicles and the cash book.

### Property management

Inspections, defects, responsibilities and deadlines.

### Municipalities and associations

Several areas and tenants, clear responsibilities and rights.

### Your own IT

Run the application and the data yourself.

The home page is yours: switch tiles off, reorder them, pin favourites – on the phone as on the desktop.

**Try it yourself:** demo access on request – prepared data, no appointment, nothing to install.  
Application 0.84.0
